Lasernet

Lasernet Connector for Microsoft Dynamics AX2012 – Release notes [Rev. 5.0.0.1 – July 2017]

Context

DLL warnings

We have change the warning so it gives you more information about the DLL files and an option to supress warnings in the future. E.g. a user that was trying to import a Lasernet setup got this:

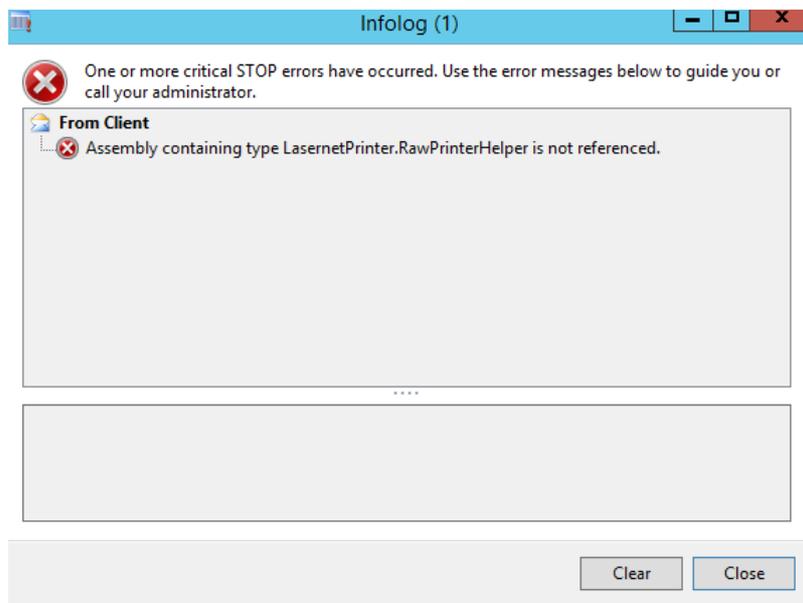

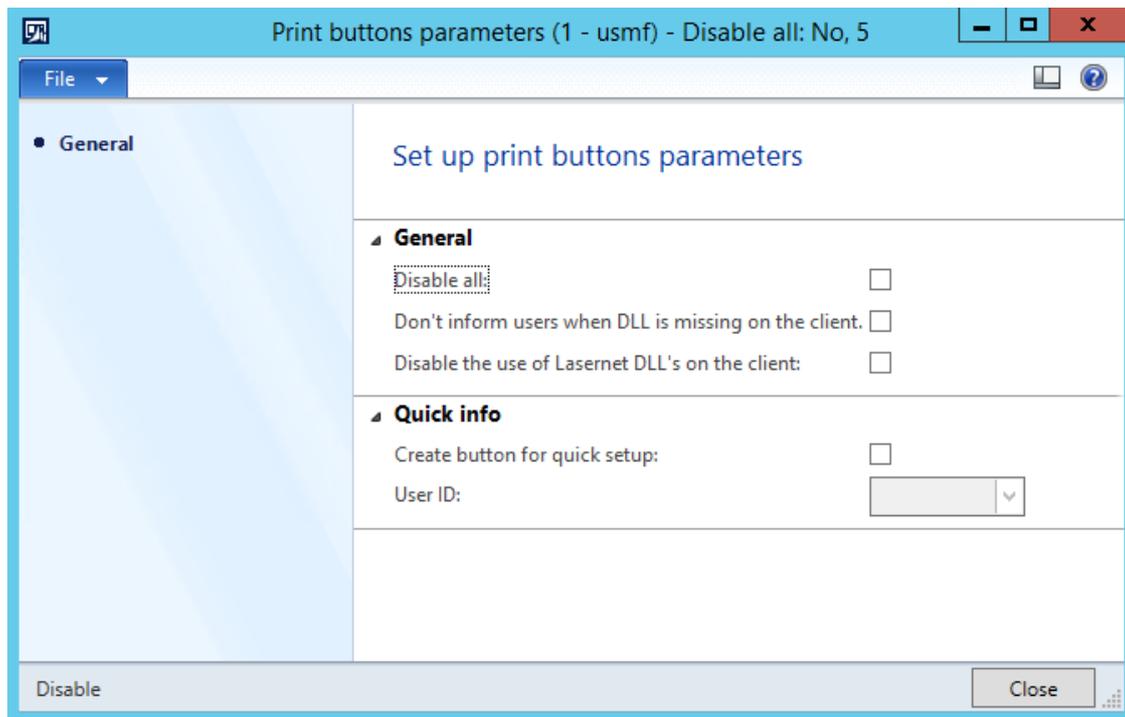

Now they get this instead:

This happens if the DLL files are not deployed from the AOS to the AX client.

Disable warnings

An administrator can disable the warning and even disable the use of the AX client DLL's. This is done within **Lasernet – Print buttons – Parameters**

General	Description
Disable all	Disable all buttons so no buttons are available when selected
Don't inform users when DLL is missing on client	Disable warning for users when DLL's are missing
Disable the use of Lasernet DLL's on the client	Disable the use of DLL files on the client. Used for getting local AX client printers
Quick info	**Description**
