Lasernet 10 System Requirements.

For information about Lasernet 10 system requirements, see https://support.formpipe.com/guides/topic/1544-lasernet-system-requirements.

Important Information to Read Before Upgrading to Lasernet 10.7.

New Installers, Connections, Sign in, and SDK from Lasernet 10.2

The installation procedure and the configuration procedure, for several of the client applications, changed at Lasernet 10.2. There are now separate installers for Lasernet Server 10 and Lasernet Developer 10.

If you haven't read the release notes for Lasernet 10.2, we recommend that you do so before you install Lasernet 10.7, so that you can learn how to upgrade to Lasernet 10.2 and newer, and learn about changes in third-party modules that have been developed with the Lasernet SDK.

Software Changes Made to Enable Formpipe to Release Lasernet While Microsoft Defender is Wrongly Detecting Malware in Lasernet Monitor

Since December 2023, Microsoft Defender has been flagging the LnMonitor.exe software as Trojan:Win32/Znyonm!pz or Phonzy malware. However, this is a "false positive", and Microsoft has confirmed that this is the case.

For more information, see https://support.formpipe.com/news/posts/lasernet-monitor-exe-file-detected-as-malware-by-microsoft-defender.

The issue is due to the software that generates the Insights for Performance and Transactions charts. To be able to deliver security
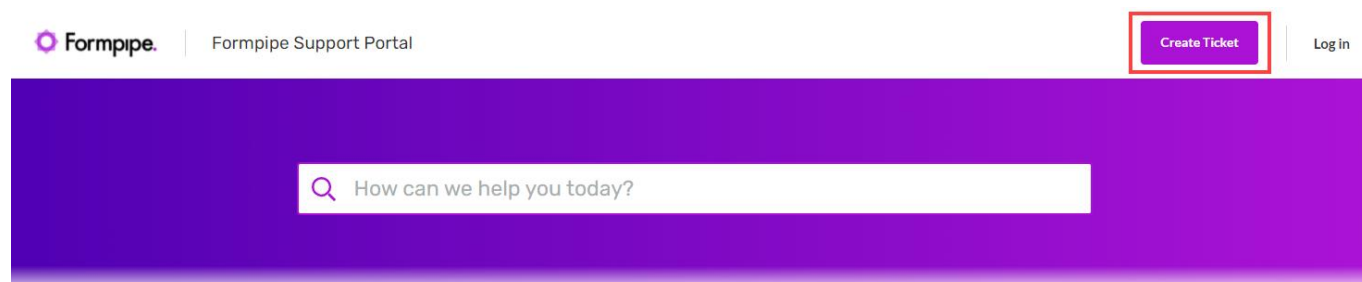

patches and fixes for our users of Lasernet 10, Formpipe Software has decided to exclude the Performance and Transactions tabs, and also the functionality embedded in those tabs, from Lasernet 10.7 to prevent Lasernet Monitor being flagged as malware.

You don't have to take any further actions to avoid this issue after you upgrade Lasernet Monitor to version 10.7.

Maintenance Report.

The following fixes and enhancements are included with this version of Lasernet.

If you encounter difficulty while using Lasernet, please contact us via the **Create Ticket** button in the support portal.

Internal Ref.	External Ref.	Area	Details	Status
379079	34463, 33804	Config Server	Changed authentication behavior to prevent Lasernet attempting to log a user in as an Active Directory Lasernet user if they failed to successfully authenticate as a local Lasernet user. Previously, if an Active Directory Lasernet user had the same user name as a local Lasernet user, Lasernet tried to "fall back" to the Active Directory user in this scenario.	Fixed
382724 399361		Config Server	Fixed some sync errors, on the web site, where various fields and icons were not updated properly in the UI after renaming a value.	Fixed
396903		Config Server	Fixed a security issue where a user without administrative rights was allowed to view the history of a configuration.	Fixed
390170		Developer	After running a module in Test Mode in Lasernet Developer (where the test successfully completed and generated output jobs, using grab data pasted into the data box), clicking **Save** to create a grab file from the pasted data and then running the module test again did not create any output jobs.	Fixed
394835, 396902, 396904		Developer	The **Inactive** status flag for Form, Subform, and Phrases objects was not shown in the **Export Object(s)** and **Import Object(s)** dialogs.	Fixed
395065		Developer	The last hidden/unhidden status of columns was not saved into the Windows Registry for all list views.	Fixed
401304		Developer	The PDF Form Filler engine was displayed in the **Forms** pane even after it was removed from the list of modules.	Fixed
399950	36012	Form Editor / Engine	Barcode objects that represented Swiss QR barcodes were still processed even the Object/JobInfo criteria was false.	Fixed
393545, 399178	36012	Form Editor / Engine	Fixed an issue with Swiss QR barcodes and the encoding of UTF-8 characters.	Fixed
399024	36303	Job Engine / Service	Fixed an issue running the XML Transformer and PDF Form Filler modifiers, from a modifier event, on the XML Transformer module.	Fixed
400917		Monitor app	See Software Changes Made to Enable Formpipe to Release Lasernet While Microsoft Defender is Wrongly Detecting Malware in Lasernet Monitor (on page 3).	Support
397463	36333	OCR Editor	Fixed a crash when a language was selected from a Dictionary with multi-languages and the selected OCR field didn't match any words.	Fixed
393075		Printer Output and	Added a threshold of 5 mm when detecting the paper format for PDF and DOCX documents and supporting auto-selection of paper trays for background printing. This	Improvement

Internal Ref.	External Ref.	Area	Details	Status
		Printer Service	will improve the detection of paper sizes that do not follow the standard size for paper formats (such as A3, A4, Letter, etc.).
