# Lasernet 10 System Requirements.

For information about Lasernet 10 system requirements, see <https://support.formpipe.com/guides/topic/1544-lasernet-system-requirements>.

## Important Information to Read Before Upgrading to Lasernet 10.8.

### New Installers, Connections, Sign in, and SDK from Lasernet 10.2

The installation procedure and the configuration procedure, for several of the client applications, changed at Lasernet 10.2. There are now separate installers for Lasernet Server 10 and Lasernet Developer 10.

If you have not read the [release notes for Lasernet 10.2](#), we recommend that you do so before you install Lasernet 10.8, so that you can learn how to upgrade to Lasernet 10.2 and newer, and learn about changes in third-party modules that have been developed with the Lasernet SDK.

### Software Changes Made to Enable Formpipe to Release Lasernet While Microsoft Defender is Wrongly Detecting Malware in Lasernet Monitor

Since December 2023, Microsoft ® Defender has been flagging the LnMonitor.exe software as Trojan:Win32/Znyonm!pz or Phonzy malware. However, this is a "false positive", and Microsoft has confirmed that this is the case.

For more information, see <https://support.formpipe.com/news/posts/lasernet-monitor-exe-file-detected-as-malware-by-microsoft-defender>.

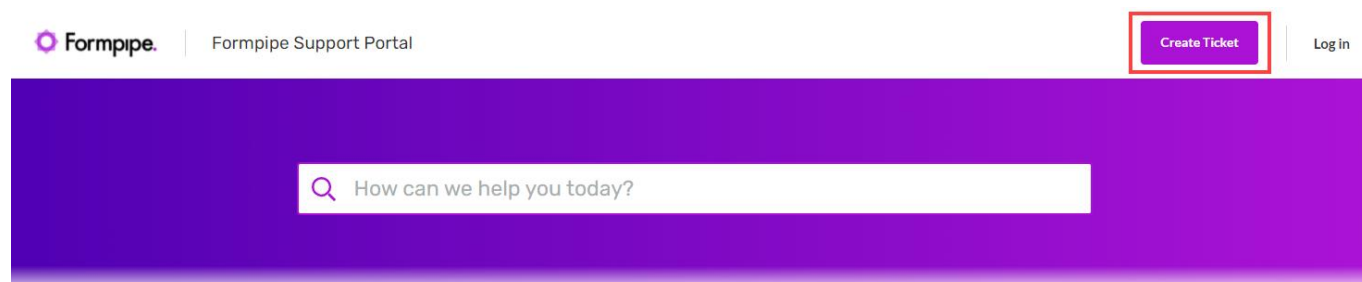

The issue is due to the software that generates the Insights charts on the **Performance** and **Transactions** tabs of Lasernet Monitor. To be able to deliver security patches and fixes for our users of Lاسernet 10, Formpipe Software has decided to exclude the **Performance** and **Transactions** tabs, and also the functionality embedded in those tabs, from Lاسernet 10.7 onwards to prevent Lاسernet Monitor from being flagged as malware.

You do not have to take any further actions to avoid this issue after you upgrade Lاسernet Monitor to version 10.8.

# Maintenance Report.

The following fixes and enhancements are included with this version of Lasernet.

If you encounter difficulty while using Lasetnet, please contact us via the **Create Ticket** button in the support portal.

Internal Ref.	External Ref.	Area	Details	Status
408994		Config Server	Fixed an issue that made it possible to remove the system Administrator group.	Fixed
405355		Developer	Fixed an issue where the <b>Help &gt; Reset Help</b> menu item did not restore previously dismissed help text overlays to the application.	Fixed
405613		Developer	Fixed an issue where <b>Duplicate</b> was available in the right-click menu for the <b>Master</b> server (in the main area of the window when <b>Servers</b> was selected in the <b>Tools</b> area).	Fixed
405681 408121		Developer	Fixed some UI glitches in the <b>Printers</b> and <b>JobInfo</b> tabs of server <b>Properties</b> windows.	Fixed
408753		Developer	Fixed an issue where moving a <b>from</b> destination for a Pass-Through module was not possible via drag'n'drop when in diagram mode.	Fixed
409844		Developer	Fixed a UI issue that caused some profile properties in the <b>Security Profiles</b> area to be displayed in the wrong column.	Fixed
402438		Engines	Fixed an issue where the following engines did not create a new JobID (cloned job) after combining only a single job: Compression Engine, JobToXML, RichTextConverter, PDF Engine, TIFF Engine, and PDF Merger.	Fixed
407867		Form Editor	Fixed an issue where the Subform Editor, when in JSON mode, could not be closed after a parse error occurred in a template.	Fixed
404604		Form Engine	Fixed an issue that caused the Form Engine to use an extensive amount of memory when processing batch jobs in text input mode.	Fixed
409746		Input modules	Fixed a critical service crash that occurred on Leap Day (29 <sup>th</sup> February during a Leap Year) if in Scheduler the <b>Type of Event</b> setting for input modules was <b>Every year</b> .	Fixed
409241		OCR Editor and Engine	Fixed an issue where some supported language names in the UI were not presented in English for the bundled Dictionary database.	Fixed
381739		OneDrive Input	Fixed an issue where the setting of the <b>Case-sensitive</b> regular expression option was not saved when the option was selected (set to true).	Fixed
381668		Mail Output	Fixed an issue where the setting of the <b>Request Delivery Receipt</b> and <b>Request Read Receipt</b> options was not always synchronized between the Lasetnet Developer <b>Properties</b> pane and the <b>Setup</b> tab of the <b>Mail Output Properties</b> window.	Fixed

Internal Ref.	External Ref.	Area	Details	Status
413726		XML Transformer Editor	Fixed a crash in the XML Transformer Editor if an XPath (used in an action) ended with a / (forward slash).	Fixed
408762	36463	XML Transformer Editor	Added support for using JobInfo substitution in XPaths used in actions (like Lasernet 9).	Fixed
