

Lasernet Roadmap 2022-2024

Published: June 2022

Job Engine 2.0

Job engine rewrite, fewer database queries ensure improved performance + SDK

Key Benefits

- Cost saving
- Better performance

INSTANCE POOLING

Load balancing and high availability

Key Benefits

- Reduces downtime and risk
- Load balancing

LASERNET INSIGHT 2.0

Performance counters with charts

Key Benefits

- Transparency
- Faster analyses
- Proactive performance indications

4K RESOLUTION SUPPORT

Split screen possibility and better UI

Key Benefits

- Better UI
- Split screen possibility

NEW OBJECT LOCKS SYSTEM IN LASERNET DEVELOPER

Continue work – even if the form is locked by another developer

Key Benefits

- Increased development efficiency
- Flexibility

SCHEDULED AND COMMAND LINE DEPLOYMENTS

Two methods to streamline the process for deployments of Lasernet 10 configurations, in silent mode, for on-premise or cloud servers

1. Manage the scheduled deployments from the Lasetnet Config Server 10 and deploy to any Lasetnet Server 10 at any given time
2. Run the deployment from a command line as a part of scripting process for most flexibility

Key Benefits

- Reduces downtime and risk
- Easier planning of deployments
- Optimized for external deployments
